Type: ROUTINE INSPECTION
Date: 30-JAN-2024

3.154

Environment enhancement to promote psychological well-being.

The facility does not have a documented bird environmental enhancement plan. This document is essential for APHIS inspectors to evaluate the quality of the environmental enhancement program provided to all birds at the facility. The facility must develop, document and follow a species-appropriate environmental enhancement plan to promote the psychological well-being of birds. This program must be approved by the attending veterinarian and available for review by APHIS inspectors.

Correct by: 02-16-2024

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

The enclosure housing one King Vulture had a very large amount of fecal material on the back wall of the enclosure. The licensee stated that it had been a couple of months since this wall had been cleaned. Excess fecal material can be a source of disease to the bird housed in this enclosure. Excreta and food waste must be removed from primary enclosures as well as under and around the enclosures to prevent the soiling of the birds in the enclosures and minimize disease hazards, insects, pests and odors. This enclosure must be cleaned.

Correct by: 02-07-2024

This inspection and exit interview were conducted with a facility representative.
