Type: ROUTINE INSPECTION  
Date: 27-JAN-2021

---

### 3.131(a) Direct

#### Sanitation.

\* The entire floor area inside one sheltered unit is covered with fecal waste. Four Zebu and one Brahma steer are in contact with the affected area located in an outdoor enclosure. Fecal waste can attract pests or rodents, become an area of disease transmission or area of contamination to the animals. Odors, insects, disease hazards or pest infestation can have an adverse effect on the health and well-being of the animals. Facility representative stated that the fecal waste was removed in the summer on 2020. The licensee shall ensure that excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. Correct by 1/30/21.

\* The facility inspection and verbal exit briefing done on 1/27/21 and exit briefing done on 1/28/21 were conducted with the facility representative.

This inspection and exit interview were conducted with
