

Inspection Report

North Carolina Zoological Park
4401 Zoo Pkwy.
Asheboro, NC 27205

Customer ID: **3229**

Certificate: **55-C-0007**

Site: 001

NORTH CAROLINA ZOOLOGICAL PARK

Type: ROUTINE INSPECTION

Date: 23-APR-2014

3.75(c)(2)

HOUSING FACILITIES, GENERAL.

Three indoor holding enclosures for chimps, lemurs, and baboons had areas of peeling paint that have exposed some concrete underneath. Need to maintain these surfaces on a regular basis to prevent ingestion of paint chips and to provide sealed, sanitizable surfaces. Correct by November 1, 2014.

3.125(a)

FACILITIES, GENERAL.

In otter holding pen, there is a piece of torn wire mesh that has numerous sharp points. Need to remove damaged wire mesh to prevent possible injury to otters. Correct by May 24, 2014.

In bison holding barn, there are areas of the lower metal ceiling that have rusted through and pieces have fallen on to the floor below. Hay and feed pans are stored in this area. While main roof has been repaired, need to remove/cover damaged areas of ceiling so that area beneath is not contaminated by falling debris. Correct by August 30, 2014.

Exit briefing conducted with facility representative.

Prepared By: F BINKLEY, D V M USDA, APHIS, Animal Care
