### 3.78(e)

#### OUTDOOR HOUSING FACILITIES.

The plastic (pvc) pipes surrounding the monkey island working as barriers for the public are not continuous because some are detached from the vertical poles holding them.

in order to restrict physical contact between the public and the nonhuman primates barriers must be completely surrounding the primary enclosure (island) and must be kept in good repair.

To be corrected by June-7-2017.

This inspection and exit interview were conducted with the facility representative.
