Collagen Solutions LLC (US)
3413 11TH Sreet East
Glencoe, MN 55336

Customer ID: **335601**
Certificate: **41-B-0279**
Site: 007
C & D FARMS

Type: RE-LICENSE INSPECTION
Date: 20-MAY-2025

3.131(a)

Sanitation.

Some pig enclosures have an excessive buildup of excreta along the back and side floor slats and walls of the enclosures. Some pigs have feces on their rumps, legs, and backs. The licensee states that the pens are cleaned before animals are placed in the pen and after they are transferred out, but it may be several weeks before the pigs are transferred out and the pens are cleaned. These pigs have been in the enclosure for several weeks and are due to be transferred out. The excess accumulation of excreta may lead to contamination of the animals, spread of disease, odors, or attract pests. Excreta must be removed from the enclosure as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. When enclosures are cleaned by hosing or flushing, adequate measures shall be taken to protect the animals confined in such enclosures from being directly sprayed with the stream of water or wetted involuntarily.

This is a 1st Re-License Inspection for a Class "B" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by July 18, 2025 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
