Underwood Family Farms L.P.

Type: ROUTINE INSPECTION

Date: 08-MAY-2025

---

### 3.125(a)

#### Facilities, general.

In two of the goat enclosure and one sheep enclosure at the Moorpark facility, there are areas in the metal wire fencing which have been broken and/or cut away. Removal of this fencing material has left metal wires exposed with sharp edges. The sharp edges are located at a level where the animals could injure themselves. One of the goat enclosures contained an old truck for the goats to climb on. A wire was sticking out underneath the truck and is a potential hazard that must be removed.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Correct by May 22, 2025

This inspection and exit interview were conducted with facility representatives.
