

## Inspection Report

Fritzler Farms Inc  
20909 Cr 33  
La Salle, CO 80645

Customer ID: **330369**  
Certificate: **84-C-0149**  
Site: 001  
Fritzler Farms, Inc.

Type: ROUTINE INSPECTION  
Date: 31-OCT-2016

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

\*\*\*Several of the goats were making coughing or gagging noises during the inspection. The VMO was told by the facility employee that the goats had been coughing since September and that the veterinarian had come out to the facility to evaluate the goats. The facility representative stated that the veterinarian had been out to see the goats but was unable to provide documentation at the time of inspection that showed a veterinary evaluation of the goats.

The licensee must ensure that all animals showing potential signs of veterinary medical problems are evaluated in a timely manner by a veterinarian as part of the facility's programs of adequate veterinary care and that the facility use appropriate methods to prevent, control, diagnose, and treat diseases, and injuries at all times. The licensee must ensure that evaluations of the animals made by the veterinarian and facility staff must be documented and readily available to APHIS upon request and include sufficient detail to demonstrate the provision of adequate veterinary care.

\*\*\*There was no program of veterinary care nor acquisition and disposition records available for review at the time of the inspection.

The facility representative sent a copy of the program of veterinary care to the VMO via electronic mail the day after the inspection.

The written program of veterinary care is needed to ensure that the facility understands the expectations of the attending veterinarian in regards to the veterinary care of regulated animals. The facility should ensure that the written program of veterinary care and acquisition and disposition records are available for review during all USDA inspections. Each facility shall allow USDA officials to examine records required to be kept by the Animal Welfare Act.

To be corrected by: November 8, 2016

### 3.125(a)

Prepared By: DOMINIQUE ENGEL D.V.M, D V M USDA, APHIS, Animal Care

## Inspection Report

---

### FACILITIES, GENERAL.

\*\*\*There were numerous sharp wire ends on the bottom of the fencing that separated the goat enclosure from the pig racing area which were in areas of potential contact with either the goats or the pigs. These wire points could lead to injury.

The housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. A system of timely identification, facility repair, and maintenance must be in place.

To be corrected by November 8, 2016

### 3.125(c)

### FACILITIES, GENERAL.

\*\*\*An opened bag of goat feed was lying on top of a pile of extension cords in a small shed. The bag had a hole at the bottom where feed was coming out. The food within the opened/damaged bag is unprotected from vermin or other pests.

Supplies of food must be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin to ensure the health and well-being of all animals. A system of food storage which adequately protects the supplies of food for all animals must be in place.

To be corrected by: November 8, 2016

### 3.131(c)

### SANITATION.

\*\*\*There were two electric cords running through the goat enclosure. One of the electric cords was torn, with the metal wires coming out of the rubber insulation.

These electric cords do not have electricity running through them, however they could be ingested by the goats.

\*\*\*A section of metal fencing and plastic mesh is kept inside the goat enclosure when it is not in use. The metal points on the ends of the fencing were very sharp when touched by the inspector. The plastic mesh and metal fencing are placed in an area of potential contact with the goats and could lead to injury.

All premises shall be kept clean and in good repair in order to protect the animals from injury. All accumulations of trash shall be cleared as necessary to protect the health of the animals.
