Type: ROUTINE INSPECTION
Date: 31-MAY-2024

3.125(a) Critical

Facilities, general.

A gate was left open and 9 fallow deer escaped a little over a week ago. Four deer were recovered but 5 deer remain missing.

Failure to ensure facilities housing animals are maintained to contain the animals can result in animal escape with possible inability to recover or injury/death.

Housing facilities must be structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

Correct by: From May 31 forward.

3.152(b)

Facilities, outdoor

There was a cockatoo being exhibited perched on a fence post. There was no shelter or shade provided.

Animals without shelter or shade from inclement weather may suffer from stress, low body temperature, and decreased immune system function.

Outdoor housing facilities must provide adequate shelter and have areas of shade to prevent discomfort from direct sunlight, precipitation, or wind.

Correct by: July 19, 2024

This inspection and exit interview were conducted with the licensee.
