Dustin's Top Notch Camel Rides

Type: ROUTINE INSPECTION
Date: 24-FEB-2017

2.40(b)(2) CRITICAL

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The youngest male camel in the herd appears to have a thinner body conformation than would be normal for an animal its size and age. There are also some patches of hair loss beginning to appear on his sides and neck. These conditions point to a probable beginning health issue which needs to be addressed by the attending veterinarian.

This animal needs to be seen by the attending veterinarian for evaluation and diagnoses as soon as possible to head off a potential health problem.

Correct by: ASAP or no later than March/5/2017.

This inspection and exit interview were conducted with facility representative.
