3.1(c)(2) REPEAT

HOUSING FACILITIES, GENERAL.

There are least 3 plastic dog shelters that have chewed, jagged edges present around their openings. Jagged surfaces can trap debris and pathogens and contribute to disease transmission. All surfaces must be maintained on a regular basis so surfaces can be readily cleaned and sanitized.

3.6(a)(2)(1) REPEAT

PRIMARY ENCLOSURES.

There is a board that is pulled away from the post that now has 3 nail points exposed. Sharp points can potentially cause injury to the dogs. All surfaces must be constructed in a manner so there are no sharp points present.
