Customer ID: **502434**

Certificate: **88-C-0216**

Site: 003

SEAQUEST HOLDINGS, LLC

Type: ROUTINE INSPECTION

Date: 06-JUL-2022

---

### 3.51(c)

#### Facilities, indoor.

Indoor housing facilities for rabbits shall have ample light, by natural or artificial means, or both, of good quality and well distributed. The current enclosure for the 2 rabbits is in a room without windows. The available light during this inspection was on a motion sensor and only activated when a person was in the room. The rabbits were without any type of light for most of the day. A normal light cycle is required for all animals to maintain a normal circadian rhythm and therefore good health.

The rabbits need to be provided with a regular light and dark cycle.

To be completed by: July 12, 2022

This inspection and exit interview were conducted with facility representatives.
