JUNGLE ADVENTURES INC

Type: ROUTINE INSPECTION

Date: 24-APR-2019

3.84(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

A rodent was observed inside the macaque enclosure, another along the fence line outside the enclosure, and rodent burrow holes were observed under the walls to the off exhibit enclosures. Rodents can carry parasites and other diseases that could compromise the health and well-being of nonhuman primates, as well as any animals on exhibit. An effective pest control program must be established and maintained to promote the health and well-being of the animals on exhibit and reduce contamination by pests in animal areas.

Correct by 4/30/2019.

This inspection and exit interview were conducted with the facility representative.

Additional Inspectors

Adams Megan, Animal Care Inspector
