Certificate: **43-C-0414**  
Site: 001  
Promised Land Safari Park

Type: ROUTINE INSPECTION  
Date: 23-JUN-2025

---

### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At time of inspection a Moluccan Cockatoo was observed to have a significantly overgrown beak. The licensee advised that the bird was surrendered but had suffered an injury to the right side of the face and lower beak 8-10 years prior to acquisition. The licensee stated that the bird did need a beak trim but had not contacted a veterinarian to do such. Malformation and overgrown beaks can cause significant health issues such as the ability to consume food stuffs adequately or even grooming. The licensee shall have the Cockatoo seen by a licensed veterinarian for beak management.

To be corrected by 6.25.25

### 2.40(b)(3)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At time of inspection an Artic Fox was observed having overgrown nails. Overgrown nails can cause discomfort or ambulatory issues if left unattended. A proactive grooming regimen to include nail maintenance should be discussed with the attending veterinarian and implemented. Daily observation of all animals to assess their health and well-being is vital to animal husbandry.

To be corrected by 6.30.25

### 3.128

#### Space requirements.

At time of inspection a Fruit Bat was observed housed in a 4 square foot shadow box. With such limited room, the bat is not able to perform the natural posture of flying. As a larger species of bat, the Fruit Bat has a large wing span which needs sufficient room to perform natural behaviors. Additional space is to be provided to the bat so as to promote the health and wellbeing.

To be corrected by 6.30.25

## Inspection Report

---

### 3.131(d)

#### Sanitation.

At time of inspection the hedgehog enclosure was covered in flies. Flies can cause irritation and undesired animal health issues. A proactive pest control regimen should be discussed with the attending veterinarian and implemented for the control of flies.

To be corrected by 6.30.25

This inspection and exit interview were conducted with Facility Representative.
