Certificate: **58-C-1025**  
Site: 001  
MICHAEL ROSSI

Type: ROUTINE INSPECTION  
Date: 20-FEB-2018

---

### 3.31(a)(4)

#### **SANITATION.**

The licensee is using "Windex" to clean the enclosures approximately 75% of the time. The hamster enclosures (as well as other small mammal's enclosures) shall be cleaned with a detergent solution followed by a safe and effective disinfectant.

The use of "Windex" which contains ammonia can irritate the respiratory tracts of these small mammals, particularly in these fish tank type of enclosures which can hold the ammonia for a longer period of time. The attending veterinarian concurs with this assessment and recommends discontinuation of this agent.

Correct by February 21, 2018

This inspection and exit interview were conducted with the licensee
