

## Inspection Report

Tammy Spears  
934 S. Hwy. 281  
Osborne, KS 67473

Customer ID: **4160**  
Certificate: **48-A-0576**  
Site: 002  
Tammy Spears

Type: ROUTINE INSPECTION  
Date: 14-JUL-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\* One plastic bottle containing Pyrantel wormer has no written directions on how this drug is to be given and at what rate it is to be administered. In addition, a recorded expiration date was missing from the label. This drug is intermingled with other products that are currently being used at the facility and is therefore ready for use. Medications must be labeled with appropriate and accurate information in order to ensure that the contents and dosage rates of the container can be known with certainty and not used past their expiration date. The effectiveness of the dosage level and expected results could be drastically changed or may not work as anticipated if the expiration date is unknown. The licensee must ensure that all medications are labeled with dosing instructions specific for the species of animals. In addition, an expiration date must be recorded on the label. Correct by 7/28/15.

### 2.75(a)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

\* No inventory information was available on 18 unweaned puppies. Inventory information is needed to ensure the individual identity can be known with certainty and to facilitate the ability to trace all puppies. The licensee must make, keep and maintain complete and accurate inventory records that fully and correctly disclose information on all animals including any offspring born at the facility. Correct by 7/28/15.

### 3.1(c)(1)(2)

#### HOUSING FACILITIES, GENERAL.

\* An estimated two by three inch section of missing fiberglass was observed on the interior wall of one enclosure. In addition, the wallboard had a tear extending in the opposite directions from the missing section of fiberglass. Two dogs are in contact with the affected area located in sheltered housing. Jagged, sharp edges could cause potential injury. The licensee must ensure all surfaces are free of jagged, sharp edges. Correct by 7/28/15.

Prepared By: ROBERT BACON, A C I USDA, APHIS, Animal Care

Date:  
15-JUL-2015

## Inspection Report

---

### 3.8

#### EXERCISE FOR DOGS.

- \* No copy of the program of exercise for 42 dogs was made available at time of facility inspection. The program of exercise must be developed to ensure the dogs are receiving adequate exercise. The licensee must develop, document and follow an appropriate plan of exercise, the plan must be approved by the attending veterinarian and be made available to APHIS upon request. Correct by 8/14/15.
- \* The facility inspection and exit briefing done on 6/14/15 were conducted with the licensee and Robert Bacon ACI.
- \* Copy of the inspection report was sent by certified and regular mail.
