Type: ROUTINE INSPECTION  
Date: 04-SEP-2019

### 2.40(b)(2) CRITICAL

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Three rabbits died without veterinary evaluation and treatment after the veterinarian was not notified of the animals' conditions. The facility representative indicated all three rabbits were observed sneezing and had white, pus-like discharge coming from their eyes approximately three or four days before they died. She also stated the veterinarian was never contacted for evaluation and treatment of the animals. Insufficient veterinary care can cause pain and suffering in animals.

Veterinary care issues must be communicated to the veterinarian for proper diagnosis and treatment.

To be corrected: From this day forward.

### 3.125(a)

#### FACILITIES, GENERAL.

The wood climbing structures in the pasture containing the three goats, one sheep, and two llamas are in disrepair. Three of the wood boxes have broken and/or missing boards on their tops. The large wood spool has a broken edge where nails are exposed. These areas are all accessible to the animals and could cause injury.

Repair, replace, or remove the affected wood structures to prevent animal injury.

To be corrected: 9-11-19

This inspection and exit interview were conducted with the facility representative.
