Scott Allen
337 Cassville Rd
Cartersville, GA 30120

Customer ID: **7325**
Certificate: **57-C-0145**
Site: 001
SCOTT ALLEN

Type: ROUTINE INSPECTION
Date: 20-JUL-2023

3.127(d) Repeat

Facilities, outdoor.

Multiple gaps, approximately five of them, were observed below the perimeter fence of the giraffe, sheep, goats, capybara, and kangaroos. The size of the perimeter fence deficiencies ranged from 5 to 11 inches in distance below the fence (measured from the ground to the bottom wire of the fence) including at a drainage culvert and were up to maximum length of approximately 3 feet of the perimeter fence.

The lack of an adequate perimeter fence presents a safety risk to the animals within the facility since it not only has to be an adequate secondary containment system to hold animals that may escape their primary enclosures, but it should also provide a sufficient barrier to keep out unauthorized animals and persons. The gaps below the perimeter fence could allow some animal species to gain access to the animals.

The facility must ensure that the animals listed above are enclosed by an adequate perimeter fence that does not allow unauthorized animals to crawl under it while maintaining a height of 6-feet and at least three feet in distance from the primary enclosures or shall obtain a variance from the regional office. Correct by October 1, 2023.

This inspection and exit interview were conducted with the facility representative.

Additional Inspectors:

Lisa Ekman, VETERINARY MEDICAL OFFICER
