Shirley Farms
2557 South Bluff Rd
Obion, TN 38240

Customer ID: **44856**
Certificate: **63-C-0201**
Site: 001
SHIRLEY FARMS

Type: ROUTINE INSPECTION
Date: 03-OCT-2018

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The exhibitor informed the inspector that he has not made and kept records which fully and correctly disclose the required acquisition records for the animals currently on exhibit. The exhibitor has obtained a kangaroo, two cavy, four rabbits, three llamas, one camel, three alpaca, four prairie dogs, thirteen goats, five piglets (born on site) and six zebus since the last inspection/for exhibit purposes. The exhibitor verbally told the inspector where/from whom he had obtained all the animals but did not have any written records. The exhibitor shall make, keep and maintain records or forms which fully and correctly disclose all the required information (name and address from where obtained, USDA license or drivers license number/state and vehicle license number/state, date, species and number of animals) concerning all animals purchased or otherwise acquired, owned, held, leased or otherwise in his possession. Correct by Nov. 3, 2018.

2.131(d)(2)

HANDLING OF ANIMALS.

During the inspection today, the inspector noticed that the public (adults and children) were petting and feeding animals without any employee/attendant present. There is a barrier present between the public and the non-human primates but not for any of the other species present including a zebra, camels, llamas, alpacas, goats, sheep, pigs, fallow deer, kangaroo, zebu, rabbits, cavy, and prairie dogs. The only attendant noted present at the exhibit was the cashier who does not have a direct line of sight on any of the animals. To prevent injury to the public and the animals and to ensure proper human-animal interactions/feeding, an attendant must be present. The facility shall ensure that a responsible, knowledgeable and readily identifiable employee or attendant is present at all times during periods of public contact. Correct immediately.

3.127(a) REPEAT

FACILITIES, OUTDOOR.

At the start of this inspection (11:30am), three enclosure pens (one housing one dromedary camels, one housing

Inspection Report

three llamas including a young baby and one housing three alpacas including a young baby) did not have any shade. The animals did not currently show any obvious signs of heat related issues. The pens are located at the edge of a three sided roofed structure and will be in the shade in the afternoons. Due to the angle of the sun the animals are not able to get out of the sun until mid afternoon. Temperatures today was already 86 deg F (Kestral) at 11:30 am. Adequate shade is necessary to provide protection from sunlight and to help prevent overheating stress especially for the young animals. Correct by ensuring that all animals have sufficient shade to protect themselves from direct sunlight at all times.

This inspection and exit interview were conducted with undersigned facility representative.
