Date: 29-SEP-2015

3.127(d)

FACILITIES, OUTDOOR.

There is a wide gap of approximately 10-12 inches between the chain link gate and frame near the cougar enclosure. The chain that secures the gate needs to be tightened and additional chains and or fastening material needs to be used for the bottom and top of this gate. Perimeter fences must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

TO BE CORRECTED IMMEDIATELY

3.129(a)

FEEDING.

There are no nutritional supplements available during this inspection for the adult cougars. The written diet plan from the attending veterinarian includes the use of daily supplements because the facility does not use a commercial diet. These supplements need to added daily to ensure the cougars are being fed a complete nutritional diet to maintain them in good health.

TO BE CORRECTED: IMMEDIATELY

The exit interview was conducted with the Curator.
