Type: ROUTINE INSPECTION
Date: 09-AUG-2022

3.131(d)

Sanitation.

F.A.S.S. AG Guide Ch.3 Pg. 23

There is an excessive number of flies on and around the feed bunk and on the ground in the first 2 pens of the Front Holding Pens. There is wet bedding near the feed and water troughs in these two pens which is serving as a breeding ground for vermin.

One animal # 81 in Stall 11 (South Barn -Building # 6) has an excessive number of flies on her face. There are fly traps in this barn but none are located in close proximity to this stall. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

CORRECT BY : 8/14/2022

This inspection and exit briefing were conducted with facility representatives.
