

Inspection Report

Thomas Walsh
52 LEBANON RD
NORTH BERWICK, ME 03906

Customer ID: **39947**
Certificate: **11-R-0027**
Site: 001
CAT'S PAW FARM

Type: ROUTINE INSPECTION
Date: 15-JUN-2023

3.56(a)(3)

Sanitation.

Primary enclosures of several rabbits had a buildup of hair, urine, and rust on the edges of pans containing bedding underneath the wire floors. Periodic cleaning to ensure that debris is kept from building up on waste pans assists in preventing a buildup of potentially harmful bacteria and disease causing agents. The facility must ensure that appropriate cleaning is performed at a minimum of weekly.

3.56(b)(2)

Sanitation.

New rabbits delivered on June 14, 2023 were housed in cages that were not sanitized before placement of the new residents in the cages. Sanitization of cages between animals may prevent the transmission of disease causing agents. The facility must ensure the enclosures are sanitized prior to the introduction of new animals.

Correct from this date forward, June 15, 2023.

This inspection and exit interview were conducted with the facility representative.
