Type: ROUTINE INSPECTION  
Date: 18-JUN-2022

---

### 3.61(c)

#### Primary enclosures used to transport live rabbits.

There were several enclosures that did not give the rabbits sufficient space. The enclosures were not large enough for the rabbit to turn about freely and make normal postural adjustments. Licensee must ensure that primary enclosures are large enough to ensure that each rabbit contained therein has sufficient space to turn about freely and to make normal postural adjustments at all time.

To be corrected from this day, 18 June 22.

### 3.61(d)

#### Primary enclosures used to transport live rabbits.

There was one enclosure housing 16 rabbits. Primary enclosures used to transport rabbits must not contain more than 15 at one time to allow all of the animals in the enclosure to move about freely at all times.

To be corrected from this day forward, 18 June 22.

### 3.36(a)(5)

#### Primary enclosures used to transport live guinea pigs and hamsters.

There were 17 enclosures containing 17 hamsters that did not have enough ventilation. All of the containers had 1 - 3 small holes in the top. Lack of enough ventilation could lead to health issues. The licensee must ensure that all enclosures have enough ventilation to allow the animals to have proper air flow for their health and well-being and ensure
