ZOOMARS

Type: ROUTINE INSPECTION
Date: 27-OCT-2015

2.75(b)

RECORDS: DEALERS AND EXHIBITORS.

Acquisition and disposition records were not complete and accurate. Acquisition records were not consistently available for all of the animals. The animals that had been acquired prior to 2012 had very few records available, and the animals that had been acquired since then did not have all the required information under b(1) available. Disposition records were also not complete and accurate. A paper copy of the APHIS Forms 7019 or 7020 may be used to track the required acquisition and disposition information in one place for all animals, or the information must be available in the individual animal records. A system of recordkeeping that contains all the required acquisition and disposition information must be maintained.

Correction date 30 December, 2015

3.27(b)

FACILITIES, OUTDOOR.

Guinea pigs are housed in outdoor pens under a roof structure, that are protected from predators through fencing and covered with a tarp to protect them at night. The climate in San Juan Capistrano is very mild, but there is no variance present in the file approving outdoor housing of guinea pigs. A variance must be requested through the regional office for approval to keep guinea pigs outside.

Correction date 30 December, 2015

Exit interview conducted with facility personnel.
