Watering.

Two non human primates (91xx and 93xx) were not given water as directed by the research protocol on January 14, 2023. Both animals experienced a slight decrease in feces and urine for the following two days, which resolved by January 17, 2023. The facility must ensure that water is provided as required by the research protocol or as often as necessary to ensure their health and well-being.

Corrected by the facility as of January 15, 2023.

This inspection and exit interview were conducted with facility representatives.
