Certificate: **93-C-0504**
Site: 002
ROBERTA KIRSHNER

Type: ROUTINE INSPECTION
Date: 21-JUL-2023

2.134(a)(1)

Contingency planning.

The emergency action plan addresses animal escapes and human emergencies, but has not been updated to a hazards based approach, including fires and natural disasters as required by the Animal Welfare Act. Contingency plans must identify emergencies such as electrical outages, faulty HVAC systems, fires, mechanical breakdowns and natural disasters most likely to be experienced by the facility in order to provide for the welfare of the covered animals.

Correct by 31 August 2023.

3.127(d)

Facilities, outdoor.

The perimeter fence for the "D" group of enclosures, including lions, tigers, hybrids and wolves does not meet the 8 foot fence requirement for potentially dangerous animals. In several areas the perimeter fence is approximately 7 feet 6 inches to 7 feet 9 inches high, adjacent to the lockouts used by the potentially dangerous animals. Perimeter fences must be maintained so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

Correct by 31 August 2023

This inspection and exit interview were conducted with the President and manager.
