RECORDS: DEALERS AND EXHIBITORS.

The records on hand are inaccurate. A sugar glider joey sold this year in February was recorded as having been born to parents which, with further investigation, was found to be incorrect. It was determined that two glider joeys which were sold this year in April were born to those parents, while the parentage of the joey sold in February is unknown at this time. Accurate records are important for determining health trends of animals on hand and provide a valuable tool for making animal health decisions. Animal lives may be negatively impacted when records are erroneous. Licensee must make, keep, and maintain records which fully and correctly disclose the required information.

Correct by: From This Day Forward

Exit interview conducted with Licensee.
