Certificate: 21-C-0018

Site: 001

SOUTHERN TIER ZOOLOGICAL SOCIETY INC

Type: ROUTINE INSPECTION

Date: 30-JUL-2015

3.84(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The grass and weeds throughout the lemur enclosure was high. High grass and weeds prevents the keepers from conducting properly cleaning. The grass also promotes living areas for rodents, pests and vermin. Weeds and grass must be controlled so as to facilitate cleaning of the premises and pest control.

Correct by: August 7, 2015.

3.126(b)

FACILITIES, INDOOR.

The quarantine and animal holding areas humidity was noticeably high. This area currently houses several species of reptiles, a Fennec fox and a Kinkajou. The humidity for the reptiles was adequate, however for the Fennec fox which is a desert species, was too high. The high humidity could cause discomfort for species not normally acclimated to those conditions. The high humidity conditions in an area used for quarantine also promotes the propagation of pathogens including parasites. The housing facility shall be adequately ventilated to minimize moisture as well as to provide for the health and to prevent discomfort of the animals at all times.

Correct by: August 7, 2015.

The exit interview was conducted with facility representative Nancy Kitchen, Andrea D'Ambrosio, ACI and Michael Neafsey, VMO.

Additional Inspectors

D Ambrosio Andrea, Animal Care Inspector
