Type: ROUTINE INSPECTION
Date: 04-JAN-2022

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

One white sheep is limping on her right front leg . When she stands she shifts her weight off the limb. There appears to be swelling on the upper part of the leg. Approximately , 6 days ago several herd mates were killed by dogs and there is concern this sheep may have been injured by the dogs . At time of the inspection , facility employees were not aware the sheep was limping . Daily observation of animals is important to detect problems with animal health and well being . A veterinarian must be consulted concerning proper treatment for this animal. CORRECT BY : 1/5/2022

3.125(a) Critical

Facilities, general.

During the early morning hours on 12/30/2021 , two dogs gained access to the upper petting zoo by the guest cabins . One goat and seven sheep were killed by the dogs . The dogs may have gained access to the area thru a small gap on either side of the gate into the petting zoo. Facility employees check perimeter fence lines daily to ensure predators are not digging under the fence line. There was no reported evidence of an area where the dogs gained access to the property . There is suspicion the dogs were pets and brought on the property during the night by guests staying in the cabins. The gap on either side of the gate must be repaired to prevent predator access . CORRECT BY : 1/8/2022

This inspection and exit interview were conducted with a facility employee and the manager.
