3.137(a)(2)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE ANIMALS.

At least four holes were present in the expanded metal sheets over the windows in the compartments of the primary animal transport trailer (South Carolina plate #PV21191). The holes where this metal has been cut or broken leave sharp edges, most of which are bent outward away from the animal compartments. Sharp protrusions in the compartments pose a risk of injury to animals contained therein, especially during times of transport. Licensee must ensure that no sharp edges are present in the primary transport enclosures that pose a risk of injury to the animals. Correct by: September 15, 2014.

Inspected at the York Fair, York, PA.

Exit briefing conducted with owner.
