### 2.131(d)(2)

#### Handling of animals.

There was no facility attendant present within the human and animal interactive area. A male red kangaroo, allowed to interact freely with guests, displayed aggressive dominant behavior with one patron by foaming and rubbing saliva from his mouth while wrapping his forelimbs around the waist of an anxious guest who was trying to get away, but the kangaroo was reluctant to let go. Not having an attendant present during public interaction with animals can affect animal welfare by risking injury to the public as well as the animal. A responsible, knowledgeable, and readily identifiable employee or attendant must always be present during periods of public contact. Correct by 6 September 2024.

### 3.125(a)

#### Repeat

#### Facilities, general.

There is deteriorating wood with gaps and jagged edges at the bottom of the doors leading from the public/animal contact area to feed storage room. Gaps with jagged edges in the door to the feed storage area affect animal welfare by potential rodent contamination of feed or causing physical injury to free roaming animals. The facilities must be structurally sound and maintained in good repair to protect the animals from injury and prevent entrance or escape of pests and zoo animals. Correct by 27 September 2024.

### 3.153(a)(2)

#### Primary enclosures.

The pigeon enclosure with over 80 pigeons does not contain enough perches because there is inadequate space available to allow all birds to perch at the same time. Insufficient number of perches decreases avian environmental enrichment by preventing normal behavior of this species. The facility needs to provide enough perches to comfortably hold all the birds in the primary enclosure at the same time. To be corrected by 13 September 2024.

This inspection and exit interview were conducted with the facility representative.
