Date: 22-APR-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The licensee did not follow her Program of Veterinary Care when treating her cats for fleas. The Attending Veterinarian's instructions were to use Frontline and Revolution on alternating months for ectoparasites. Instead, the licensee purchased an over the counter flea product that was labeled for use only in dogs. This product caused insecticide toxicosis in seven adult cats and four kittens. Despite treatment by the Attending Veterinarian, all four kittens died. All seven adult cats survived, but four females later aborted their litters of kittens. Not following the Attending Veterinarian's instructions in the Program of Veterinary Care can result in the use of inappropriate methods to prevent, control, diagnose, and treat diseases and injuries. The licensee must follow the Program of Veterinary Care for her animals.

TO BE CORRECTED ON APRIL 22, 2015.

***The licensee was using medications that did not have labels. She was pouring medications from large bottles of Albon and Pyrantel into smaller bottles for ease of use. However, these small bottles did not have labels that indicated what was in the bottles. Medications without labels or with incomplete labels can result in an animal receiving the incorrect medication, the incorrect dose, or expired medication. The licensee must ensure that all medication containers are labeled with the name of the medication, the dose to be given, and the expiration date.

TO BE CORRECTED BY APRIL 24, 2015.

2.50(a)(2)

TIME AND METHOD OF IDENTIFICATION.

(a)(2) Kittens less than 16 weeks of age.

The licensee was not properly identifying kittens comingled from different litters. One enclosure contained 5 kittens from one litter and 1 kitten from another litter. Another enclosure contained 2 kittens from one litter and 1 kitten from another litter. These kittens were being identified with cage cards rather than having individual identification. Appropriate identification of kittens is necessary to meet recordkeeping requirements for inventory, disposition,

transport, and healthcare documentation. The licensee must individually identify kittens that are from different litters and housed together in the same enclosure.

TO BE CORRECTED BY APRIL 24, 2015.

The inspection and the exit briefing were conducted by Konnie Plumlee-VMO with the licensee.
