

## Inspection Report

New Mexico Wildlife Association  
P. O. Box 1359  
Edgewood, NM 87015

Customer ID: **3754**  
Certificate: **85-C-0015**  
Site: 001

NEW MEXICO WILDLIFE ASSOC.

Type: ROUTINE INSPECTION  
Date: 25-JUL-2017

### 2.131(c)(1)

#### HANDLING OF ANIMALS.

The walkway into the new observation building where the public can view the 2 mountain lions does not have adequate barrier along the sides. The public can walk right up to the mountain lion enclosure along the left side. Along the right side the picket fence is falling down which would allow the public to be able to reach across touch or put fingers inside of the enclosure.

Along the dirt road on the back southeast side of the enclosure housing one raccoon is an open gap between the dead cactus that the public has access to walk right up to the enclosure.

These barriers do not adequately assure the safety of the animals and the public from possible injuries. Ensure that barriers are of sufficient distances between the general viewing public so as to assure the safety of animals and the public.

To be corrected by: August 25, 2017

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

##### 3.125(a) Structural Strength.

The fence along the front next to the tree in the enclosure housing 2 adult Elk is pushed down. The pushed down fence has broken, ripped wires with sharp edges protruding towards the animal that could potentially cause injuries and is not in good repair. Construct and maintain all facilities so that they are structurally sound, in good repair to contain and protect the animals from injuries.

Construct and maintain all facilities so that they are structurally sound, in good repair to contain and protect the animal.
