Type: ROUTINE INSPECTION
Date: 02-OCT-2014

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The inventory of animals on hand was not accurate at the time of inspection. The inventory to include animals acquired from being born on the premises or acquired by other means, such as purchase or trapping, was not being maintained. This includes, but was not limited to; 2 snowshoe hares offspring, 5 gray fox offspring, 1 bobcat offspring, 7 lynx offspring, 5 porcupine, 1 flying squirrel, 9 woodchuck, and 6 red squirrels. Incomplete or lack of records does not allow APHIS officials to track animals when necessary. Develop and maintain a method of maintaining complete facility records to include all required information under Sec. 2.75(b)(1). Correct by: 9 October 2014

3.127(d)

FACILITIES, OUTDOOR.

Five porcupines are housed in primary enclosures outside of the main perimeter fenced in area. Without the perimeter fence, these animals are unprotected from wild animals and unauthorized persons from coming in contact with the animals which could put their health at risk to disease or injury. There is also no secondary containment system for these animals in event of escape. Provide a perimeter fence for these animals. Correct by: 5 October 2014

Inspection and exit briefing conducted with Licensee.

End of report.
