Certificate: **63-T-0159**
Site: 001
DOUGLAS WILSON

Type: ROUTINE INSPECTION
Date: 24-JAN-2023

2.134(a)(2)

Contingency planning.

The current contingency plan as written identifies the situations the registrant considers potential contingencies and the items/resources carried during transport to help with emergency response. However, it lacks a description of the specific tasks required to be carried out in response to the identified emergencies/disasters. Tasks considered should include items such as detailed evacuation or shelter in vehicle instructions and provisions for feeding, watering, ventilation, bedding and veterinary care during the emergency. Having a plan in place which includes the details of the tasks to be carried out will help ensure the good health and well-being of the animals in the transporter's possession during an emergency. The facility shall, in their written contingency plan, outline the specific tasks required to be carried out in response to the identified emergencies. Correct by 2/7/23.

This inspection and exit interview were conducted with the facility representative.
