Certificate: **14-C-0051**
Site: 001
LUPA GAME FARM INC

Type: ROUTINE INSPECTION
Date: 13-MAY-2015

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At the time of this inspection it was noted that the facility had acquired 8 new goats. However, 2 of the goats were in need of attention. Their hooves were long and need to be trimmed. To ensure the health and well-being of these animals this will need to be addressed.

***To Be Corrected By: May 23, 2015

2.131(c)(1)

HANDLING OF ANIMALS.

1. The serval enclosure is surrounded by a black, metal, pipe barrier fence and the door on the far right has a 4 ft x 3 ft piece of plexiglass present over the wire mesh enclosure fencing. However, during this inspection the gate of the barrier fence, by the door, was not closed or locked. To ensure that the general public does not have direct access to these cats, this barrier situation will need to be addressed.

*** To Be Corrected By: May 16, 2015

2. The red fox enclosure is also surrounded by the black, metal, pipe barrier fence. There are also barberry bushes growing between the barrier fence and the primary fence. However, due to the slope of the landscape the general public may have access to the foxes. To ensure the safety of the public and the foxes this barrier situation will need to be addressed.

***To Be Corrected By: May 23, 2015

3.125(a)

FACILITIES, GENERAL.

1. The small clawed otters are in an enclosure that has a pool. However, the wood behind the waterfall outlet was damaged and had peeling paint present. There was also a door to the right of the waterfall that leads into the den that is also in need of attention. The slats of the wood door have begun to detach from the base. There are now gaps present. The items in this enclosure will need to be addressed to ensure that the animals are securely

Inspection Report

contained and other animals are not allowed access.

***To Be Corrected By: May 23, 2015

2. The Giraffe barn is in need of repair. There is a hole in the ceiling in the back, right corner. Although the giraffe does not have direct access to this area it will need to be repaired to ensure the integrity of the ceiling.

***To Be Corrected By: May 23, 2015

3. The shelter barn for the camels is also in need of repair. The left side of the shelter has a wood door that is covered with wood planks. However, a few wood planks are now missing and the top 12 inches of the door have splintered and holes are now present. To ensure that the camels are not injured on this door it will need to be repaired.

***To Be Corrected By: May 23, 2015

4. In the mini cow enclosure there is a 4 ft x 4 ft chain link gate between the shelter barn and the primary fence. However, the bottom of this gate had a few pieces of chain link that had detached from the bottom pole and were protruding into the enclosure. To ensure the safety of the cows this gate will need to be addressed.

***To Be Corrected By: May 17, 2015

5. The elk are housed in 2 adjacent pens. There is a solid wood fence that splits the pens in half. However, the wooden door and the wood panel to the right have ~ 12 inch holes present. To ensure the safety of these animals these areas will need to be addressed.

***To Be Corrected By: May 30, 2015

6. The African Crested Porcupine is being housed in an enclosure that has one metal wall. However, there is a small area on the bottom right of that wall that is rusty and jagged. To ensure the safety of this animal this area will need to be addressed.

***To Be Corrected By: May 23, 2015

7. The muntjacs and grey kangaroo are housed in a pen with small wooden shelter boxes. However, one shelter has a wood slatted floor. At the time of this inspection it was noted that a few of the slats had begun to detach from the wood frame and were bowing upward. These shelter boxes will need to be repaired to ensure the safety of the animals.

***To Be Corrected By: May 30, 2015

8. The reindeer pen is also in need of attention. There is a door that leads into the barn that has begun to delaminate. A section of the laminate is pulling away from the doors core material and a gap is now present. The core of the door also appears to be water damaged. To ensure the integrity of the door, this door will need to be addressed.

***To Be Corrected By: May 23, 2015

Inspection Report

9. There are several fallow deer in a pen on the right side of the road. These deer have access to several shelter barns. However, these shelters are in need of repair. One shed had a hole in the left wall, another larger shed had damaged siding and roofing shingles. To ensure the integrity of these shelters they will need to be addressed.

***To Be Corrected By: June 13, 2015

An exit interview was conducted with the licensee.
