Type: FOCUSED INSPECTION
Date: 12-JAN-2024

3.54(b)

Feeding.

The open dish type feeder in one cage containing one rabbit was covered in a layer of dried bird feces. Food dishes and food provided must be kept clean and free of contamination to provide clean, wholesome, and palatable food to the animals. Correct by ensuring rabbit food receptacles are kept clean and sanitized at least every two weeks. To be corrected by 1/25/2024.

3.56(a)(1)

Sanitation.

Three cages containing 5 rabbits had mounds of fecal material buildup in the corners and on the mesh floor. Primary enclosures must be kept free of feces and debris, which may harbor parasites and bacteria in order to provide the animal with a clean-living environment and prevent exposure to disease hazards. Additionally, the enclosures must be sanitized at least every 30 days in accordance with 3.56(b). Correct by ensuring the primary enclosures are cleaned at a frequency that will prevent the build-up of fecal material and debris.

To be corrected by 1/25/2024.

3.125(a) **Critical** **Repeat**

Facilities, general.

On Nov. 15, 2023, a shelf in the 1-year-old female "Kiki" the kinkajou's enclosure became unattached, crushing and trapping the kinkajou underneath it. The kinkajou was transported to the attending veterinarian's office but died of its injuries while in transit.

"Ceasar", the 5-year-old Male Bactrian camel was found dead in its pen entrapped beneath the corner of the metal sided shed in its enclosure around 7 am on Dec. 11, 2023. The camel had been last seen up and normal at approximately 9 pm the night before.

Failure of structures or their components can cause injury or entrapment resulting in harm or death to the animal. Both indoor and outdoor housing facilities must be soundly constructed and maintained in good repair and strength to protect and contain the animals and to prevent injury due to their failure.
