CHARLES & LINDA PICKERING

Type: ROUTINE INSPECTION
Date: 02-NOV-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the north building in the refrigerator with other ready-to-use vaccinations were a pack of expired Rabies vaccinations (expiration date: September 4, 2014) and Distemper vaccinations (expiration date: June 5, 2015). The licensee stated that he had recently used the rabies vaccination on his "hound dogs".

In the cabinet storing ready-to-use medications in the north building there were several expired or unlabeled medications. There was a bottle of "Albon" with an expiration date of July 2015, a bottle of "metronidazole" with the expiration date scraped off, and several small bottles of unknown medications with unknown expiration dates.

The use of expired medications and vaccinations may be ineffective and cause unintended reactions and results. The licensee must not use expired medications and vaccinations, and must use appropriate methods prevent, control, diagnose and treat diseases and injuries.

TO BE CORRECTED BY: NOVEMBER 6, 2015

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

The two enclosures west of the garage, all three enclosures in the south building, and the south three enclosures in the north building had varying degrees of brown greasy residue around the openings of the shelters. The bedding was broken down into small pieces. The licensee stated bedding is added as necessary and that the enclosures and shelters are more than hosed down about 3-4 times a year with a detergent and or disinfectant.

The lack of sanitization can cause disease. The licensee must sanitize hard surfaces according to 3.11(b) at least every two weeks and more often if necessary to reduce disease hazards.

TO BE CORRECTED BY: NOVEMBER 16, 2015
