Type: ROUTINE INSPECTION
Date: 25-FEB-2020

3.77(f)

SHELTERED HOUSING FACILITIES.

There is no perimeter fence enclosing the outdoor area of the sheltered housing facility for the ring-tailed lemurs. A perimeter fence protects the lemurs by restricting unauthorized humans and animals from going through it or under it and having contact with the lemurs. A perimeter fence must be constructed around the outdoor area and it must be at least 6 feet high, 3 feet away from the primary enclosure wall, and restrict unauthorized persons and animals from going through it or under it.

TO BE CORRECTED BY MAY 1, 2020.

This inspection and exit interview were conducted with a facility representative.
