Omaha, NE 68107

Customer ID: **5108**

Certificate: **47-C-0003**

Site: 001

OMAHA ZOOLOGICAL SOCIETY/HENRY DOORLY ZOO

Type: ROUTINE INSPECTION

Date: 05-NOV-2015

3.127(d)

FACILITIES, OUTDOOR.

The following areas were identified where the perimeter fence is of insufficient height, has gaps, and/or is not currently in good repair:

- 1) An approximately 28 inch wide area is only 70.5 inches high in a corner where the perimeter fence transitions from construction chain link to the brown wooden zoo fence
- 2) An approximately 1 foot wide gap is present between the baja gate and the adjacent fencing
- 3) A section of fencing is sagging past the baja gate due to a missing pole
- 4) A large tree has dropped over the fence diagonally, on the east perimeter fence behind the lodge
- 5) Behind the VIP House part of the perimeter is less than 8 feet where the wood fence transitions to a chain link fence
- 6) An approximately 8 inch by 8 inch hole is present in the chain link past the green house near the employee parking area

Perimeter fences must be of an appropriate height and be maintained in good repair to prevent entry by unauthorized person and animals and to serve as a secondary containment system for the animals in the facility. The licensee must ensure that the facility is enclosed by a perimeter fence that is of sufficient height and construction to keep animals and unauthorized people out and is not less than 8 feet in height for potentially dangerous animals.

TO BE CORRECTED BY: DECEMBER 1, 2015

This focused inspection, limited to the "big cat " area and the perimeter fence(s), and exit conference were conducted by ACI Bartels and SVMO Ziegerer with the General Curator, and the Safety and Security Manager.
