Type: ROUTINE INSPECTION  
Date: 06-JUN-2024

---

### 3.125(a)

#### Facilities, general.

In the sheep, goat, and alpaca enclosure, there are several areas of fencing in a state of disrepair. The wire fencing material around the bottom of the fence has become partially detached in multiple areas which has created sharp points at the level of the animals.

Failure to maintain enclosure fencing can allow for gaps, unstable structures, or sharp points which can result in injury, entrapment, or escape of the animals.

Facilities shall be maintained in good repair to protect the animals from injury and contain them.

Correct by: June 14, 2024.

### 3.154

#### Environment enhancement to promote psychological well-being.

The facility does not have a written program for environment enhancement for their emus, ducks, and chickens which were recently acquired. The licensee has been providing the birds with regular enrichment opportunities, however, a documented program hasn't been developed.

A written plan for environment enhancement is necessary to ensure the psychological well-being and overall health of the birds.

Exhibitors must develop, document, and follow a species- appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions.

Correct by: June 21, 2024.

This inspection and exit interview were conducted with the licensee.
