

Inspection Report

China Airlines
11201 Aviation Blvd
Los Angeles, CA 90045

Customer ID: **26108**
Certificate: **93-T-0029**
Site: LAX
CHINA AIRLINES

Type: ROUTINE INSPECTION
Date: 26-JUN-2023

3.14(c)(3)

Consignments to carriers and intermediate handlers.

Although the certifications of the last offerings of food and water, with a signature, for 20 dogs on flight CI512, AWB 29716472912, from PEK to TPE to LAX, were available, the specific instructions for the next feeding and watering for a 24-hour period were not. This information is required to complete the certifications. A system should be in place to ensure food and water certifications, for dogs in transit, contain the required information.

3.17(c)

Food and water requirements.

Three of the 20 travel crates had food/water receptacles which were not securely attached to their primary enclosures. Microchip numbers were verified by Animal Care personnel.

"Pipi" MC# 992001001497929, a female golden retriever. Her plastic water/food receptacle was not securely attached to the travel enclosure.

"Maosi" MC# 992001001498349, a female golden retriever. Her plastic water/food receptacle was not securely attached to the travel enclosure.

"Scarlet" MC #900219001330202, a female golden retriever. One side of her plastic water/ food receptacle was not securely attached to the travel enclosure. This receptacle was also chewed on and the rim was torn off.

To protect the health and well-being of the animals, food and water receptacles should be securely fastened to the inside of the travel crates and be constructed of such materials appropriate for the animals they are intended for. Food and water receptacles must be securely attached inside the primary enclosure and placed so that the receptacles can be filled from outside the enclosure without opening the door. A system should be in place to ensure the requirements are followed.

This inspection and exit interview were conducted with the facility representative.
