Type: ROUTINE INSPECTION
Date: 15-JAN-2025

2.131(b)(1) Critical

Handling of animals.

On 26 Aug 2024 a Naked Mole Rat was critically injured and subsequently euthanized when accidentally caught in a junction between a corridor and a nest box being moved for cleaning. Protocol in place at the time was followed to account for all animals before handling but the individual animal moved through tunnels that were visually obscured. Corridor 14 unintentionally moved with nest box 13 as it was removed and the animal was caught in the junction between the two. Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma.

Corrected at the time of inspection on 16 January 2025.

This inspection and exit interview were conducted with Zoo staff.

Additional Inspectors:

Darren Rausch, VETERINARY MEDICAL OFFICER
