Site: 001
VERNON D MILLER

Type: FOCUSED INSPECTION
Date: 18-NOV-2024

3.153(c)

Primary enclosures.

There were no aquatic areas in the indoor enclosure that contains three domestic ducks, which are aquatic birds. This deficiency can lead to malnutrition, poor condition, debility, stress, and/or abnormal behavioral patterns. Primary enclosures housing wading and aquatic birds must contain a pool or other aquatic area and a dry area that allows easy ingress or egress of the pool or other aquatic area. Pools and other aquatic areas must be of sufficient surface area and depth to allow each bird to make normal postural and social adjustments, such as immersion, bathing, swimming, and foraging, with adequate freedom of movement and freedom to escape from aggression demonstrated by other birds in the enclosure. Dry areas must be of sufficient size to allow each bird to make normal postural and social adjustments with adequate freedom of movement and freedom to escape from aggression demonstrated by other birds in the enclosure. The facility must correct by providing such an aquatic area that complies with this and other applicable regulations. Correction Date: November 29th, 2024

This inspection and exit interview were conducted with a facility representative.
