Type: ROUTINE INSPECTION
Date: 05-MAR-2024

2.75(b)(1)

Records: Dealers and exhibitors.

The record of animals on hand was not updated to reflect changes in animal numbers including births and deaths of capybara and goats as well as the acquisition of 2 mara in December 2023. Failure to maintain and update required records such as the record of animals on hand impedes the ability of APHIS officials to perform their duties in assessing animal welfare and tracking movement of animals. Every exhibitor shall make, keep and maintain records or forms which fully and correctly disclose information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized or otherwise disposed of by that exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

Correct by 8 March 2024.

3.156

Watering

The metal water container provided for 1 greater currawong, 2 vulturine guineafowl and 1 domestic guineafowl had numerous eraser-sized spots of orange rust covering the bottom and sides of the pan. Rusty water receptacles cannot be properly cleaned and sanitized and may contaminate drinking water, thus making it non-potable. Potable water must be provided in sufficient quantity to every bird housed at the facility, unless restricted by the attending veterinarian. Water receptacles must be kept clean and sanitized as often as necessary to keep them free from contamination.

Correct from this date forward of 6 March 2024.

This inspection and exit interview were conducted with facility representative.
