Type: ROUTINE INSPECTION
Date: 05-NOV-2024

2.40(b)(3) **Direct** **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

In the petting zoo area there were two juvenile pot-bellied pigs that were very itchy. The black and white pig had scaly ears and had hair loss on the neck, legs and rib cage. There was an open sore about 2 inches by 1 inch behind the right elbow. The facility reported that they had noticed the problem. The veterinarian had not yet been consulted by the facility. Not seeking timely veterinary care for illness, disease, and injury can delay treatment and prolong suffering. Conditions can continue to deteriorate without veterinary intervention.

Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

A complete routine inspection was conducted on 05 November 2024. This inspection is limited to the direct noncompliance identified during that inspection. An additional inspection report will be delivered with the other issues identified during this inspection. This inspection and exit interview was conducted with facility representatives. The exit briefing was conducted 05 November 2024.
