Customer ID: 1391

Certificate: 72-R-0013

Site: 001

NICHOLLS STATE UNIVERSITY

Type: ROUTINE INSPECTION

Date: 24-JUL-2014

3.56(a)(1)

SANITATION.

There was excessive accumulation of feces, dust and hair under the wired flooring of the rabbit enclosures. The fecal accumulation is a potential for disease hazard, and creates a favorable environment for insects and other pests. The enclosures must be cleaned, and the registrant must develop and maintain a cleaning program that will prevent the accumulation of debris, cobwebs, hair and excess feces from becoming excessive.

To be corrected by 29 July 2014

Routine inspection and exit briefing conducted with facility representatives.

Prepared By: NATALIE COOPER, D V M USDA, APHIS, Animal Care
