Type: ROUTINE INSPECTION
Date: 07-JUL-2025

3.125(c)

Facilities, general.

The goat feed was being stored in a container without a lid. This could allow the food to become contaminated or allow vermin access. Food must be stored in a manner which adequately protects against deterioration, molding or contamination by vermin. The facility corrected the issue by switching the food storage container with one which had a tight fitting lid.

*****Corrected on July 7, 2025 at the time of inspection

This inspection and exit interview were conducted with the facility representative.
