Certificate: **31-C-0229**  
Site: 001  
MICHELLE IDDINGS

Type: FOCUSED INSPECTION  
Date: 12-MAR-2024

### 2.75(a)(2) Repeat

#### Records: Dealers and exhibitors.

The facility is not keeping a Record of Disposition of Dogs and Cats (APHIS form 7006). Records indicate that two rottweiler puppies changed ownership and the facility did not use an APHIS form 7006 to document this change. Failure to use APHIS form 7006 does not allow for proper traceability and management of regulated animals at a facility. Each dealer and exhibitor shall use the Record of Acquisition of Dogs and Cats on Hand (APHIS Form 7005) and Record of Disposition of Dogs and Cats (APHIS Form 7006) to make, keep, and maintain the information required by paragraph (a)(1) of this section. Provided, that if a dealer or exhibitor who uses a computerized recordkeeping system believes that APHIS Form 7005 and APHIS Form 7006 are unsuitable for him or her to make, keep, and maintain the information required by paragraph (a)(1) of this section, the dealer or exhibitor may request a variance from the requirement to use APHIS Form 7005 and APHIS form 7006. Correct by ensuring all required information is fully and correctly documented on an APHIS Form 7006 or by obtaining a variance.

### 2.75(b)(1) Repeat

#### Records: Dealers and exhibitors.

The facility's list of animals on hand was not up to date. The records on hand does not include two Emu. An inaccurate record of animals on hand does not allow for proper traceability of regulated animals. Complete records are needed for proper management of the regulated animals at a facility and those being brokered, acquired, held, and sold.

Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born or hatched of any animal while in his or her possession or under his or her control. The licensee added the two Emu to the animal inventory record during the inspection. Additionally, correct by ensuring all records are current and complete.

### 3.6(a)(2)(i)

#### Primary enclosures.

An enclosure housing two adult wolf hybrids had sharp points on top of one side of the fencing of the enclosure that is accessible to the animals. Failure to maintain enclosure fencing without sharp points can result in injury to the animals.

## Inspection Report

---

The licensee covered the sharp points with a board during the inspection. Correct by ensuring that primary enclosures are constructed and maintained so that they have no sharp points or edges that could injure the animals. Correct by 16-March-2024.

### 3.80(b)(1)

#### Primary enclosures.

Two ring-tailed lemurs are housed in an enclosure that provides less than the minimum required amount of space. The two ring-tailed lemurs were in a cage that is approximately 31 inches wide by 21 inches deep, providing approximately 4.5 square feet of floor space. Based on the common weights of ring-tailed lemurs, they are classified as group 2 primates under the Animal Welfare Act and each require 3 square feet of floor space for a total of 6 square feet of floor space needed. Inadequate space for animals may cause stress, obesity, or not allow them to make normal social or postural adjustments. Correct by providing each animal with an enclosure that provides the minimum required amount of floor space. Correct by 16-March-2024.

### 3.154

#### Repeat

#### Environment enhancement to promote psychological well-being.

The licensee was unable to provide a written environmental enhancement plan for the two Emu, two Canary's, and one Cockatiel held at the facility. A written plan is necessary to ensure that the overall health, well-being, and psychological needs of the birds are being appropriately met. Failure to follow a species-appropriate environmental enhancement plan can lead to psychological distress and abnormal behaviors in birds housed at the facility. Facilities that house avian species must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be in accordance with the currently accepted professional standards as cited in appropriate professional journals or reference guides, and be approved by the attending veterinarian. The plan must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. The environmental enhancement plan must be made available to APHIS officials upon request.

This is a continuation of the report for the routine inspection conducted on 12-March-2024 and contains the remaining non-compliances found during the inspection. The exit briefing for the items included on this report was conducted on 14-March-2024.

This inspection was conducted with the licensee. The exit briefing for the non-critical non-compliances was conducted with the licensee on 14-March-2024.
