DENVER ZOOLOGICAL  
FOUNDATION

Type: ROUTINE INSPECTION

Date: 25-APR-2022

---

### 3.84(d)

#### **Cleaning, sanitization, housekeeping, and pest control.**

Multiple live roaches were seen in the Emerald Forest kitchen on the drying rack for clean dishes as well as on other tools used for preparing nonhuman primate diets.

Pests can spread disease and contaminate animal areas and feed which can negatively impact the well-being of nonhuman primates. An effective program for control of insects, external parasites affecting nonhuman primates, and birds and mammals that are pests, must be established and maintained.

To be corrected by May 16th, 2022.

### 3.101(a)(1)

#### **Facilities, general.**

There are multiple areas of cracked and crumbling concrete in the sea lion enclosures, including on the west island in the primary exhibit and the main deck in the secondary exhibit. The facility has mitigated some areas on the main decks in both exhibits with rubber mats but are not able to cover all areas of exposed and cracked concrete. A work order was submitted by keepers for the sea lion exhibit; however, the request only referenced an area on the main deck of the secondary exhibit. The facility has long-term improvement plans for the primary and secondary exhibit but there are many areas that need to be addressed now. All five sea lions currently have rotating access to both exhibits.

## Inspection Report

---

Defects on the coating surface or missing chunks of concrete may cause injury to the animals through skin abrasions, lacerations, or other means. Cracking or other structural defects in the pool may put animals at risk. Indoor and outdoor housing facilities for marine mammals must be structurally sound and must be maintained in good repair to protect the animals from injury.

To be corrected by June 1st, 2022.

This inspection and exit interview were conducted with facility representatives.
