### 3.125(a)

#### Facilities, general.

There were two recent escapes of both Arctic foxes, "Luna" and "Echo" from their primary enclosure. On 2/23/24, the foxes escaped through an opening made by an improperly closed service gate. Both animals were successfully captured, secured in a holding enclosure for observation overnight, and received physical exams by the attending veterinarian. On 3/6/24, Arctic foxes "Luna" and "Echo" escaped their primary enclosure a second time by chewing through the rope-like netting over the top of the enclosure. Zookeepers recaptured both foxes by netting approximately 45 minutes later. Allowing animals to escape their primary enclosures places them in danger and provides a severe threat to their health and well-being. Ensure that all animals, including "Luna and Echo" are securely contained within their primary enclosures and that the primary enclosures are structurally sound and maintained in good repair.

Correct from 5/15/24 going forward

This inspection and exit interview were conducted with the facility representatives.
